Signal Processing 35 (1994) 311–312
Elsevier

Cumulative contents of Volume 35

Volume 35, No. 1, January 1994

Papers

M.E. Aladjem
Multiclass discriminant mappings 1

S. Chen, S. McLaughlin and B. Mulgrew
Complex-valued radial basis function network, Part I: Network architecture and learning algorithms 19

Y. Hua
High resolution imaging of continuously moving object using stepped frequency radar 33

L. Goldfeld and D. Wulich
Performance of a correlation demodulator in the presence of a speech signal 41

A. Ahlén and M. Sternad
Filter design via inner–outer factorization: Comments on "Optimal deconvolution filter design based on orthogonal principle" 51

Short communications

N.J. Fliege
Half-band bandpass filters and filter banks with almost perfect reconstruction 59

A. Kangas
Algorithms for adaptive factorization of polynomials 67

J. Le Roux and P. Solé
Least-squared error reconstruction of a deterministic sampled signal Fourier transform logarithm from its N-th order polyspectrum logarithm 75

Acknowledgment 83

Erratum 93

Book reviews 95

Volume 35, No. 2, January 1994

Papers

A. Mecocci, F. Bartolini and V. Cappellini
Image sequence analysis for counting in real time people getting in and out of a bus 105

J.-J. Shyu, S.-C. Pei and K.-C. Fu
Complex Lagrange multiplier approach to the design of arbitrary complex coefficient FIR digital filters 117

P. Händel, P. Stoica and T. Söderström
Asymptotic variance of the AR spectral estimator for noisy sinusoidal data 131

S.R. Pillai and S.T. Nugent
Design of three channel power complementary filters with maximally flat characteristics 141

E. Anarım, H. Aydınoğlu and İ.C. Göknar
Decision based directional edge detector 149

J.-H. Lee and S.-D. Kim
An error analysis of gradient-based methods 157

Elsevier Science B.V.

Y. Hua and J.B. Evans
Statistical analysis of the SDMP method for parameter estimation of multiple transients 163

Thesis alerts 173

Announcements 185

Calendar 193

Volume 35, No. 3, February 1994

Papers

J.-L. Starck and A. Bijaoui
Filtering and deconvolution by the wavelet transform 195

T. Sun, M. Gabbouj and Y. Neuvo
Center weighted median filters: Some properties and their applications in image processing 213

B. Carlsson and P. Händel
A notch filter based on recursive least-squares modelling 231

A. Liavas and S. Theodoridis
Efficient Levinson- and Schur-type algorithms for block near-to-Toeplitz systems of equations 241

P.P. Kanjilal and S. Palit
The singular value decomposition – Applied in the modelling and prediction of quasiperiodic processes 257

H.I. Shahein and H.M. Abbas
ECG data compression via cubic-splines and scan-along polygonal approximation 269

S. Hayashi, M. Suguimoto and G. Kishi
Low bit-rate MPC coders with adaptively controlled synthesis filter parameters 285

K.-C. Tan, M.H. Er and G.-L. Oh
A new measure for assessing the accuracy of direction-of-arrival estimate 295

Short communications

E.D. Dickmanns
Historical development of use of dynamical models for the representation of knowledge about real world processes in machine vision 305

J.L. Crowley
Response to comments by Professor Dickmanns 307
